

## Girls in the Woods Week 2020

As a Girl Scout, you may love being outside, but did you know you can pursue a future career in the outdoor industry? In September 2020, Girl Scouts of Oregon and Southwest Washington hosted a week-long celebration of women in outdoor careers, inspired by GSOSW's annual backpacking trip in the [Willamette National Forest](#).

Girl Scouts took a behind-the-scenes look at careers with the US National Forest Service through videos with women who work in botany, recreation, timber and more. There were also live panel interviews with women who work in wildlife biology, oceanography and mapping!

If you missed our live activities, click the links below to watch video recordings and access the activity sheets.

If you're a Cadette, Senior or Ambassador who dreams of working in the outdoors, start the [Outdoor Career Exploration: Trails to Your Future patch](#). This patch program features interviews with women who have outdoor work experience, career preparation activities and tips to help Girl Scouts land their dream outdoor job.
